■ A clinical threshold was crossed — professional follow-up is recommended.

What this means

Hi Hussain. Most of your markers look good; worth keeping an eye on: Kidney Health, Hydration. Novera is a health screening tool, not a medical diagnosis. Consult a healthcare professional for medical advice.

Your self-care plan

Today: drink a glass of water now and go easy on salt in your next meal.

This week: spread your water intake across the day, and add 500 mL of water before your workout.

Retest: take a fresh reading in 7 days.
