الذكاء الاصطناعي الوكيل 2026

Engineer it with AI Competition

Competition overview

The competition aims to empower Oman's technical talent to design and build real, launched solutions powered by **Agentic AI**, intelligent solutions capable of analyzing information, making decisions, and executing tasks autonomously, through hands-on training, expert mentorship, and collaborative teamwork.

Participants

24 teams of 4 members

A diverse cohort spanning:

- Students
- Employees
- Job seekers

All participants possess strong technical backgrounds tailored for AI development.

Timeframe

70-Day Journey

An intensive program starting from July and wrapping up in September 2026.

Designed to help teams move from an initial idea to a fully launched, high-impact product through a series of evaluation stages.

Deliverables

By final evaluation, every team must launch a functional **solution powered by Agentic AI** in one of these categories:

- **Mobile Apps:** Published on Apple App Store or Google Play Store.
- **Web Platforms:** Live, published, and fully operational.
- **Hardware:** Working physical prototype ready for live demonstration.

Outcomes & Prizes

Top 15 teams will showcase their innovations in dedicated booths to senior government officials and industry leaders at the closing ceremony.

Winning Rewards:

- **Top 3 Teams** compete directly for substantial cash prizes.
- **6 Additional Prizes** awarded for outstanding categories.

Competition journey

Evaluation criteria

Scoring guideline

CRITERIA 01

Impact, Business Potential & Viability

"Does the product solve a real problem? Is there a realistic path to becoming a sustainable business?"

Score 1 - Unclear or unrealistic

Product doesn't solve a real problem. Business model is unclear or unrealistic. No path to sustainability.

Score 3 - Moderate impact

Product solves a real problem with moderate impact. Business model has potential but needs refinement.

Score 5 - Significant & sustainable

Product solves a significant problem with tangible market impact. Business model is well thought out and realistic. Strong path to sustainable business.

CRITERIA 02

Relevance and Innovation

"Is Agentic AI central to the product? Does it offer something genuinely new or better than existing solutions?"

Score 1 - Surface level features

Agentic AI is a surface feature, not core. Solution is similar to existing products with no differentiation.

Score 3 - Central & improved

Agentic AI is central to the product. Solution offers meaningful improvements over alternatives with clear value proposition.

Score 5 - Essential & novel

Agentic AI is essential to core functionality. Solution is genuinely novel with strong competitive advantage and compelling differentiation.

CRITERIA 03

Technical Product

"Does the product solve a real problem? Is there a realistic path to becoming a sustainable business?"

Score 1 - Prototype / Mockup Only

Product is prototype/mockup only. Not live or functional. Poor technical depth. Weak user experience.

Score 3 - Partially Launched

Product is partially launched with decent technical depth. Accessible but may need refinements. Good user experience. Agentic AI integration present.

Score 5 - Fully Launched & Live

Product is fully launched & live. Sophisticated technical architecture. Agentic AI integrated well. Excellent user experience & interface design.

Scoring guideline

CRITERIA 04

Team and Future Plans

"Does the team have complementary skills and clear roles? Is there a realistic plan for post-competition?"

Score 1 - Lacks Complementary Skills

Team lacks complementary skills. No clear roles or future plans. Most work done by one person.

Score 3 - Good Collaboration & Roadmap

Team has most required skills with good collaboration. Clear roles. Basic roadmap for future but could be more detailed.

Score 5 - Strong Dynamics & Clear Plan

Team has all critical skills with strong dynamics. Clear, detailed roadmap for growth. Everyone knows their role well.

CRITERIA 05

AI Safety and Oversight

"Does the solution address AI safety, data security, privacy, and ethics? Is there a human oversight mechanism?"

Score 1 - No Consideration

No consideration of AI safety, data security, privacy, or ethics. No human oversight mechanism.

Score 3 - Reasonable Safeguards

Addresses AI safety and privacy with reasonable safeguards. Considers ethical implications. Clear human oversight mechanism.

Score 5 - Comprehensive & Robust

Comprehensive approach to AI safety, data security, and privacy. Robust ethical safeguards. Clear mechanisms for human monitoring and control.

CRITERIA 06

Pitch Quality

"Does the pitch clearly cover all sections? Is the demo live and functional (not video/mockup)?"

Required: Problem, Solution & value proposition, Business model, Next steps, Team, Live demo

Score 1 - Non-Functional / Unclear

Demo is non-functional/video/mockup. Pitch is unclear, missing key sections. Difficult to follow.

Score 3 - Functional & Good

Demo is functional and good. Pitch covers most required sections clearly. Easy to follow.

Score 5 - Excellent & Live

Demo is excellent and live. Pitch clearly covers all sections. Compelling presentation easy to understand.

Evaluation Criteria Overview

Impact, Business Potential and Viability
الأثر، الجدوى التجارية، وإمكانية النمو
25%

The product should solve a real problem with tangible impact on an actual market, and have a realistic path to becoming a sustainable business.

Relevance and Innovation
الارتباط بموضوع المسابقة والابتكار
20%

Agentic AI should be at the heart of the product and the it should offer something clearly new or better than what's already out there.

Technical Product
المنتج التقني
25%

The product must be a real, working version accessible via published apps, live websites, or a functioning hardware prototype, with strong technical depth and a clearly explained user experience.

Team and Future Plans
الفريق والخطط المستقبلية
10%

The team should show strong collaboration with complementary, clearly-defined roles, plus a realistic plan for what they'll do after the competition ends-not just what they've already built.

AI Safety and Oversight
السلامة والرقابة على الذكاء الاصطناعي
15%

The product should address AI safety, data security, and privacy, with thought given to ethical risks like bias or misuse, and clear mechanisms for human oversight and control over AI actions.

Pitch Quality
جودة العرض
5%

The pitch should clearly and logically cover all required sections—problem, solution, value proposition, business model, next steps, team, and a live product demo—in.

What it means	Description	وصف المعيار
Real-World Impact مدى التأثير واقعيًا	Does the product solve a genuine problem? Does it have a meaningful effect on a real community, industry, or market – not just a theoretical one?	مدى تأثير المشروع على المجتمع أو السوق المستهدف من الجوانب الاقتصادية والاجتماعية.
Commercial Viability الجدوى التجارية	Is there is a realistic path for it to become a sustainable business or commercial product in the future.	إمكانية تحويل المشروع إلى منتج تجاري يحقق الربحية.

What it means

Effective use of
Agentic AI
التوظيف الفعّال
للذكاء الاصطناعي
الوكيل

Originality and
Value Proposition
أصالة المشروع
والقيمة المضافة

Description

Is Agentic AI central to how the product works, not just a feature added on top? Does it automate, reason, or act in ways that a simple rule-based system could not?

Does the product offer something genuinely new or meaningfully better than what already exists? Can the team clearly explain what makes their solution different and why it matters?

وصف المعيار

هل يُشكّل الذكاء الاصطناعي الوكيل جوهر عمل المنتج، لا مجرد إضافة سطحية؟ وهل يؤدي مهام لا يستطيع نظام تقليدي القيام بها؟

هل يقدم المنتج شيئاً جديداً أو أفضل مما هو موجود؟ وهل يستطيع الفريق شرح ما يميز حلهم بوضوح وماهي قيمته المضافة؟

What it means

Product Readiness
جاهزية المنتج

Description

Is the product real and live – not a mockup or prototype on paper? Mobile apps must be published on App Store or Google Play. Web platforms must be accessible online. Hardware must be a working prototype.

وصف المعيار

هل المنتج حقيقي وجاهز للاستخدام. التطبيقات يجب أن تكون منشورة على المتاجر، والمنصات متاحة على الإنترنت، والأجهزة (hardware) جاهزة كنموذج أولي يعمل فعلياً.

Technical Depth
العمق التقني

How deeply is the technical solution built? Evaluators will assess the system architecture, technologies used, and how Agentic AI is actually leveraged in the product.

ما مدى عمق البناء التقني للحل؟ من ناحية مستوى التعمق التقني المستخدم في تطوير الحل، مثل طريقة بناء النظام، والتقنيات المستخدمة، وكيفية توظيف الذكاء الاصطناعي الوكيل في المشروع.

Product Quality
جودة المنتج

Overall user experience, quality of the interface and design, and how clearly the team can explain the technical side of what they built.

جودة العرض التقني ويشمل واجهة المستخدم، سهولة الاستخدام.

What it means

Description

وصف المعيار

Team Cohesion & Skills
قوة الفريق وتجانسه

Does the team work well together? Do members have complementary skills – e.g., technical, design, business – and is there a clear sense of who does what?

قوة الفريق من ناحية المهارات والقدرات، ومدى التعاون والتجانس بين الأعضاء.

Roadmap after the competition
خارطة الطريق بعد المسابقة

Does the team have a clear and realistic plan for what they will build and do after the competition ends? The question is not just 'what did you build' but 'what comes next?'

هل لدى الفريق خطة واضحة وواقعية لما بعد المسابقة؟

What it means

AI Safety, Ethics & Oversight
السلامة والأخلاقيات والرقابة على الذكاء الاصطناعي

Description

Does the solution address AI safety, data security, and user privacy? Has the team considered the ethical implications of their AI decisions, including potential bias or misuse? And is there a clear mechanism for human oversightg ensuring humans can monitor, intervene, or override AI-driven actions when needed?

وصف المعيار

هل يعالج الحل مسائل أمان الذكاء الاصطناعي، وحماية البيانات، وخصوصية المستخدم؟ وهل أخذ الفريق في اعتباره الجوانب الأخلاقية لقراراتهم التقنية، بما في ذلك تجنب التحيز وسوء الاستخدام؟ وهل هناك آلية واضحة تضمن بقاء الإنسان في دائرة الرقابة والتحكم في قرارات الذكاء الاصطناعي؟

What it means

Clarity & Coverage
وضوح العرض

Description

Does the presentation clearly and logically cover all the required sections? Is it easy to follow and understand, even for someone who is unfamiliar with the product?

Required sections:

- The problem
- The solution
- Value proposition and competitor comparison
- Business model
- Next phase plans
- The team, their experience, and backgrounds
- Live product demo (the demo must showcase the actual working product, not a video or a mockup).

وصف المعيار

هل يغطي العرض جميع المحاور المطلوبة بشكل واضح ومنظم؟ وهل يسهل متابعته وفهمه حتى لمن لم يسمع بالمنتج من قبل؟
المحاور المطلوبة:

- المشكلة
- الحل
- القيمة المقترحة ومقارنة الحل بالمنافسين
- نموذج العمل
- خطط المرحلة القادمة
- الفريق وخبراته وخلفياته
- عرض حي للمنتج (يجب أن يتضمن العرض المنتج الفعلي، وليس مقطع فيديو أو نموذجًا أوليًا غير تفاعلي (Mockup)).
